FUN 2

WELCOME TO THE SOL TEAM

You have just acquired a high-quality product, manufactured under one of the most demanding industry standards worldwide. We are certain that this equipment will allow you to learn, increase and amplify your knowledge and technique for your flights.

We hope your FUN 2 will provide you with many happy moments and that you're experiencing moments that will last forever in your memory. This way our philosophy will proof right: security, performance, easy handling and innovation.

Please, read this manual carefully. All necessary information you'll need for your new equipment is right here.

In case of questions or doubts regarding your paraglider or in case you simply are interested in our new products - we are at your dispose.

Thank you very much for choosing SOL PARAGLIDERS.

Symbols

Warnings and important notes - pay attention and read carefully

Additional information

Notes regarding environment protection

- This is an equipment for your training on the ground. It wasn't made for flight. You alone are responsible for all risks that come with his use. The inappropriate and/or abusive use of your equipment increases this risk.

- It's not possible to transfer this responsibility of risks, using this equipment, to the producer, distributor or seller.

- A regular training, whenever possible, especially on the ground, is indispensable and necessary. A poor handling and control of the glider, especially on the ground, is one of the most frequent causes of accidents.

- It is in your responsibility as a pilot to know what your insurance covers.

- We recommend that every new or reviewed paraglider will be inflated and verified on the ground.

- Always use your safety equipment (helmet, hand-gloves and boots).

- Check all your equipment before each training. Never use inappropriate or damaged equipment.

- All pilots has to follow the rules of the sport required in each country.

- Before each training check your physical and mental state. Are you fit for training?

- Before training choose the right equipment and environment, check the weather conditions, if you have any doubt - don't train.

- Never inflate your FUN 2 during rain, snow, strong wind, turbulent conditions or if thunderstorm clouds are in the sky.

- If you are always training with conscious - you'll be able to train for many years your FUN 2.

IMPORTANT NOTES

FUN 2 - THE PROJECT

Ground-handling is one of the most important aspects of paragliding progression. With the FUN 2, pilots can progress and learn the most basic or most advanced aspects of groundhandling even in strong winds safely and easily.

The FUN 2 is an equipment for your training on the ground. It wasn't made for flight. You alone are responsible for all risks that come with his use. The inappropriate and/or abusive use of your equipment increases this risk.

Don't take any risk! Never fly this equipment! Always be accompanied during training by your instructor.

Read this manual before using your equipment.

Recommendation

ו 🗎

The FUN 2 is destined to all pupils or pilots who are seeking to improve their domain over the paraglider. We recommend the use of safety equipment during the training.

Certification

The FUN 2 is not certified, because he isn't a paraglider for flight, but only an equipment for training on the ground.

Special characteristics

Compact - Resistant - Easy control

Accessories

Along with your FUN 2 you receive:

- Bag Fun.
- Packing strap.
- Protection sack for the risers.
- Manual.
- Windsock M.
- Little bonus surprise.

- 7. Connection to harness.

FUN 2

Line plan

The suspension point design was developed for an ideal weight distribution and long life. During all consideration and calculation, security always is our first goal.. The used material mix for the lines of the FUN 2 forms an ideal combination: long life with little deformation and aerodynamic drag.

Never and under no circumstances the line length can be altered!

BRAKEHANDLE

FUN

2

PACKING

Step 1: Bundle up your FUN 2 in form of a cabbage. This way you're avoiding that the FUN 2 drags over the ground during folding.

Step 4: Fold the wing like an accordion from both sides and put one side over the other. Now all reinforcements are laying side-wise one above the other.

Step 2: Begin with the center of the trailing edge. Put one profile over the other. Each side separate.

Step 3: Now do it in the same way with the leading edge profiles. Put the reinforcements of top and bottom in the right way, don't close the cell openings and push out the fabric.

Step 5: Fold the sack as shown in the photo. This method is very gentle to the more stiffer parts of the FUN 2.

Step 6: At last put the FUN 2 into the protection bag.

Storing

Most part of the FUN 2 fabric is Nylon. As all other synthetic materials it suffers and deteriorates under the influence of ultraviolet radiation (UV). It looses his stiffness and gets more porous. Whenever it is possible avoid to submit your FUN 2 to the sun light, it has a high UV rate, especially in heights. It is recommended to store your FUN 2 very well whilst it not in use. It should be stored dry in a dry place, protected from UV rays, distant from chemical products. Avoid to store the FUN 2 in hot places like the trunk of a car.

TIPS FOR CARE

- Over-stressing of individual lines, more than normal load in training, should be avoided. An excessive deformation is irreversible and can't be undone. For the same reason avoid stepping on the lines, bending or folding them, especially the main lines.

- Always open the FUN 2 on clean ground, otherwise dirt could penetrate the fabric, shorten the lines or damage the canopy. Lines should not be entangled to objects during the phase of inflation, otherwise they could be deformed or damaged. Never step on the canopy, especially not on hard ground.

- Training with strong wind conditions could force the FUN 2 to crash uncontrolled with high velocity on the ground, the crash could damage fabric and sewings.

- In case of a Line Over the brake lines could wear of or a main line could be cut by a brake line or crack by friction.

- Handling the FUN 2 on a earthy ground under strong wind conditions accelerates the aging process of your equipment.

- After a water or tree landing the FUN 2 must be sent for inspection to an authorized dealer's workshop.

- It must be avoided that sand, stones or snow enter in the cells, otherwise the weight on the trailing edge could brake the glider and cause a full-stall. Besides, the sharped edges could damage the sail's fabric.

- Training be careful, avoid crashing the leading edge on the ground. Otherwise the material and sewings of the cell openings could be damaged.

- In case the FUN 2 gets in contact with salty water, he must be washed with sweet water and dry in the shadow. Never use tools to accelerate the drying process. Salty water could reduce the line resistance and increase the porosity of the fabric, even washed out with sweet water.

- After any kind of accident: the equipment must be sent for inspection to an authorized dealer's workshop or to the manufacturer.

- Keep up to the required inspection data, to assure that your equipment is always save for use.

This equipment wasn't made for flight, nevertheless, keep him well maintained is very important for a correct functionality. We recommend an annual revision.

Repairs must manufacturer.

WARRANTY

WARRANTY - 1 YEAR / 100 HOURS OF USE

SOL Paragliders is giving a product warranty against defect materials and fabrication defects, within normal conditions of use, in other words within the use the product is destined for, during 1 (one) year or 100 hours of use, whatever comes first, as long as the conditions pre-defined were observed.

The warranty covers the pay free repair or substitution, within the fabrics understanding, of the materials for others in perfect conditions.

Warranty Terms:

1. This information to use materials and errors of manufacturing product, due observated as goals are;

Warranty Pre-requisites:

1. A warranty registration must be filled out correctly within 30 days after the purchase (you can find the registration here: (www.solparagliders.com.br/registro.php).

2. The equipment must be kept and used in accordance with the instructions provided in this manual. All the storage, folding, cleaning and care instructions must be carefully taken.

3. Maintenance and inspections can only be performed by the manufacturer or authorized dealers' workshops and must be properly documented.

4. The owner is responsible for all shipping expenses to and from the manufacturer.

5. In order to make a plea for repair or equipment exchange, which shall be decided and performed only by SOL Paragliders, the owner must send the paraglider to the manufacturer with the following documents:

- The product and a copy of all inspection data and the history of use.
- A copy of the warranty registration from SOL Paragliders

This Warranty Does Not Cover:

1. Any alterations on original fabric colors, lines and risers.

2. Any damage caused by chemical products, sand, friction, cleaning products or salt water.

3. Any damage caused as a result of errors during operation, incidents or emergency situations.

4. Any damage caused by inadequate operation of the product.

5. A product that may have been subjected of any alteration from the original design and without proper permission from SOL Paragliders.

6. Damages caused by inappropriate transport, storage or settings of the product.

7. Damages caused by the use of not compatible components with the product.

8. Damages caused by the use of inappropriate packaging for the transport.

9. Products without original identification label and serial number.

10. Handling the product otherwise than to the instructions given in the owner's manual.

Please be aware of our environment: don't toss your FUN 2 into nature, respect the animals. Remember: nature is our FUN 2 engine.

If your FUN 2 gets out of use remember it cannot be recycled. Please give it to your dealer or your flying-school, they should know how to handle it.
